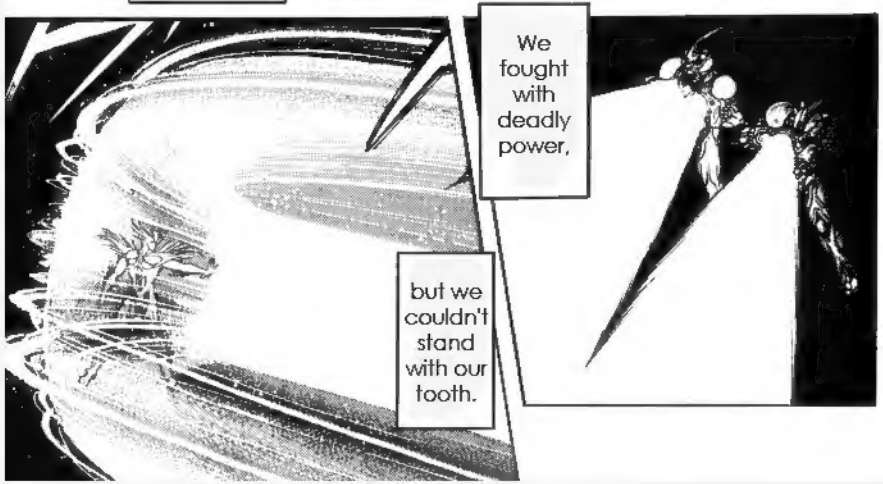
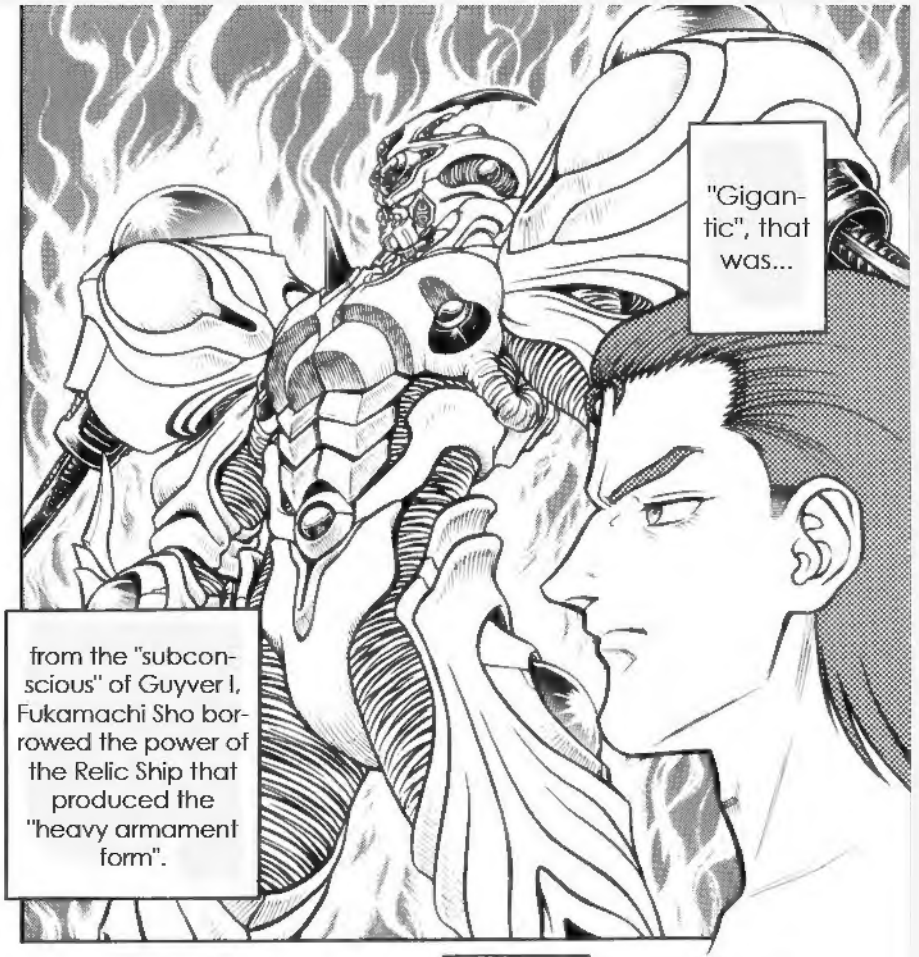
Me and Fukamachi met our strongest enemy.
2 years ago on that day above the skies of Mount Minakami...

Archanfel.
The 12 Zoalord's top point and commander of Cronos...

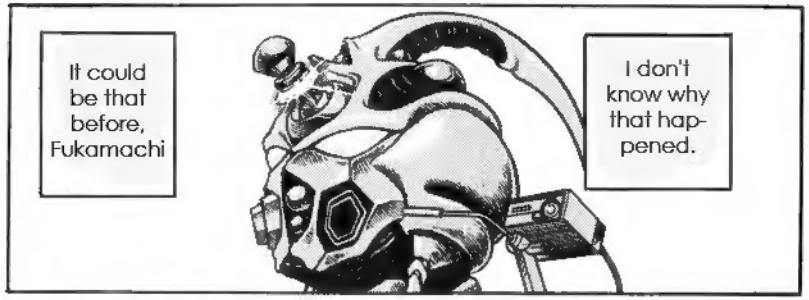


We fought with deadly power,
but we couldn't stand with our tooth.

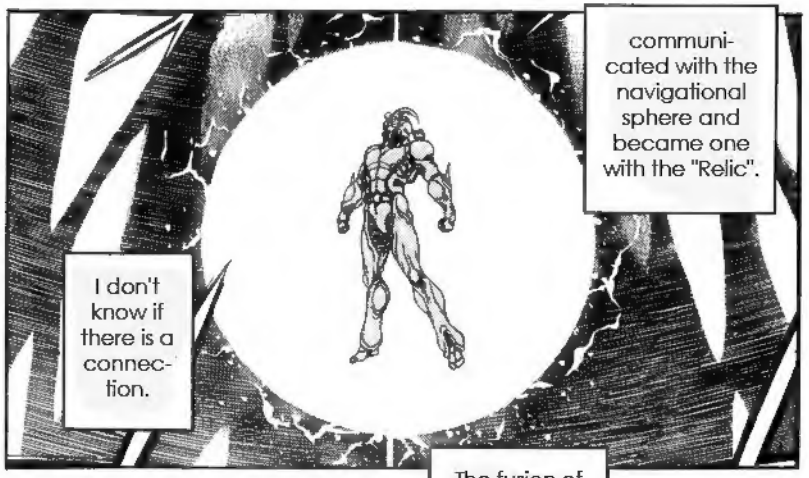


"Gigantic", that was...
from the "subconscious" of Guyver I, Fukamachi Sho borrowed the power of the Relic Ship that produced the "heavy armament form".

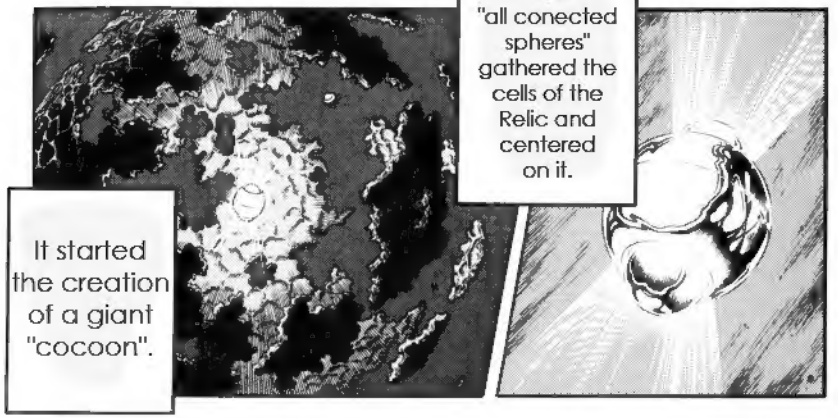
Those guys.... to fight with the "Zoalord".



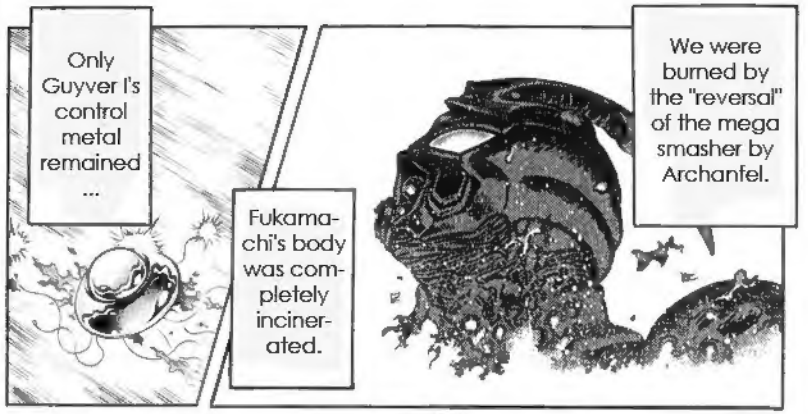
It could be that before, Fukamachi
I don't know why that happened.



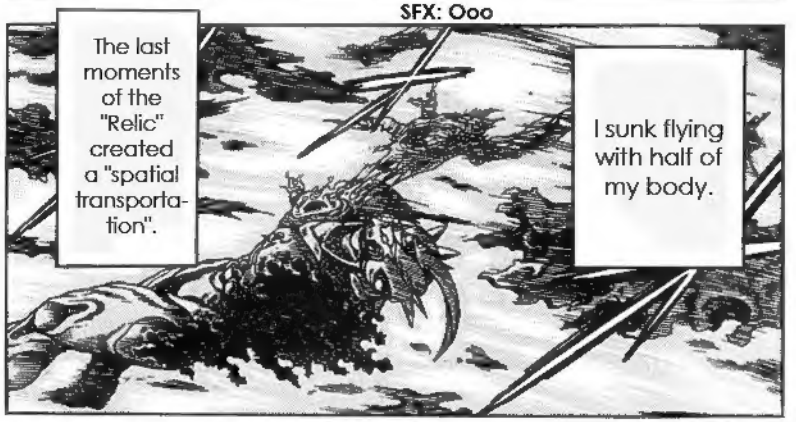
communicated with the navigational sphere and became one with the "Relic".
I don't know if there is a connection.



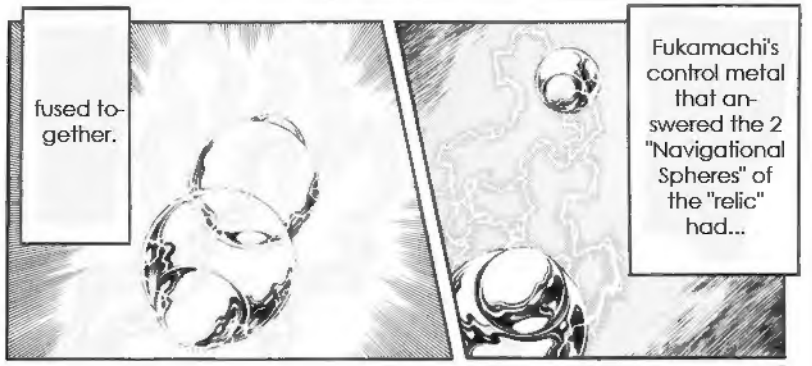
The fusion of "all conected spheres" gathered the cells of the Relic and centered on it.
It started the creation of a giant "cocoon".



Only Guyver I's control metal remained ...
Fukamachi's body was completely incinerated.
We were burned by the "reversal" of the mega smasher by Archanfel.

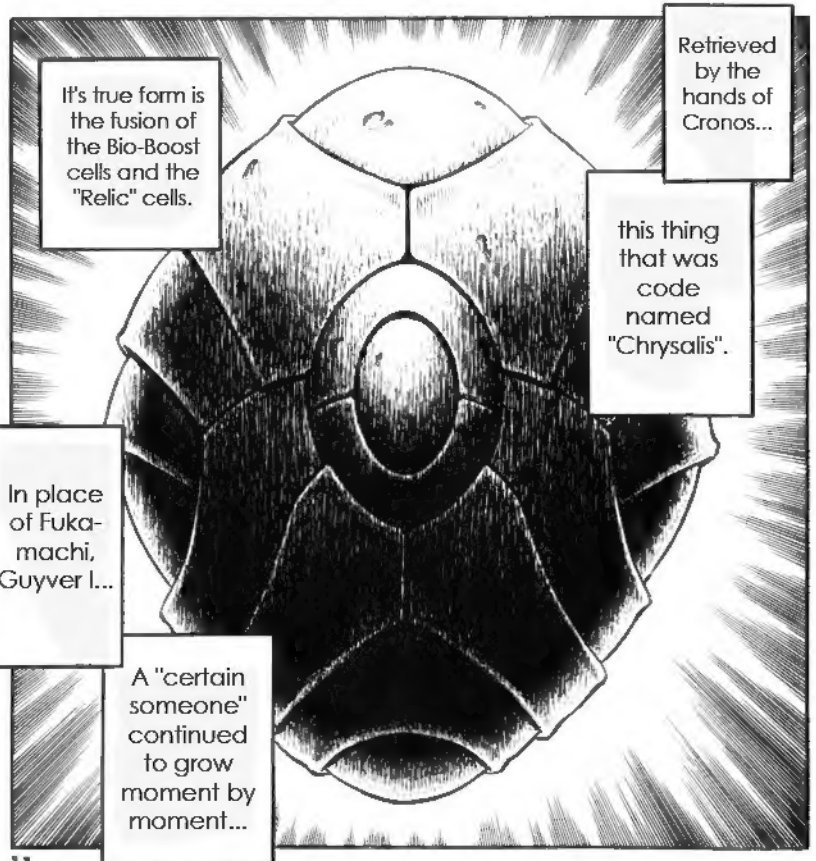


SFX: Ooo
The last moments of the "Relic" created a "spatial transportation".
I sunk flying with half of my body.

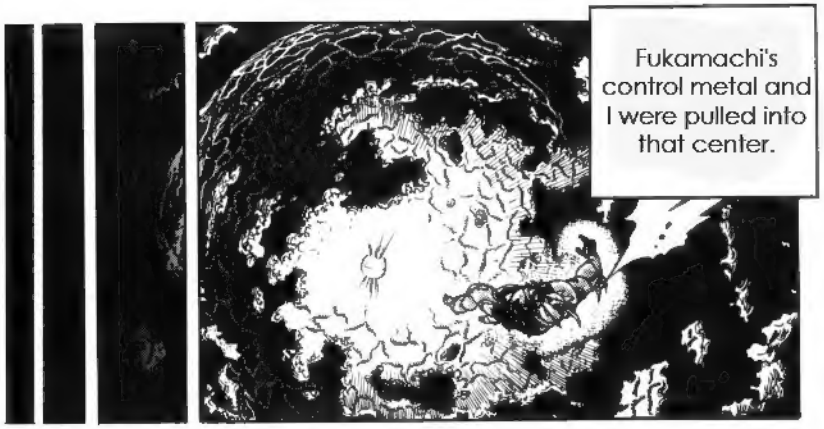


fused together.
Fukamachi's control metal that answered the 2 "Navigational Spheres" of the "relic" had...

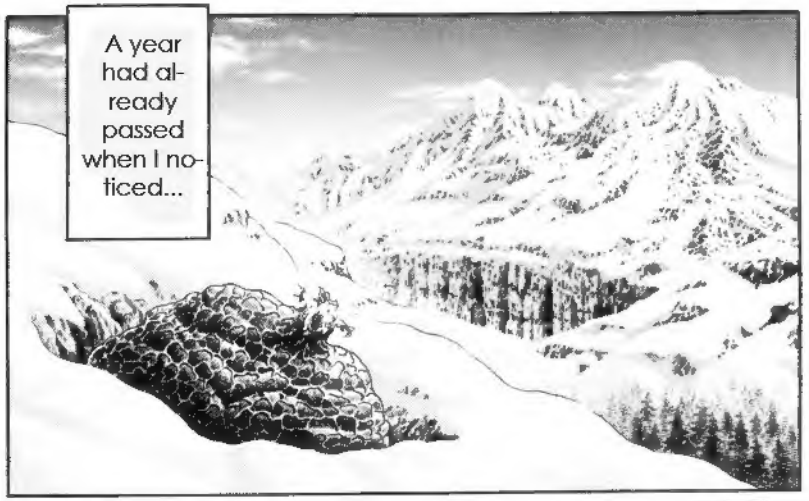
In place of him there was....



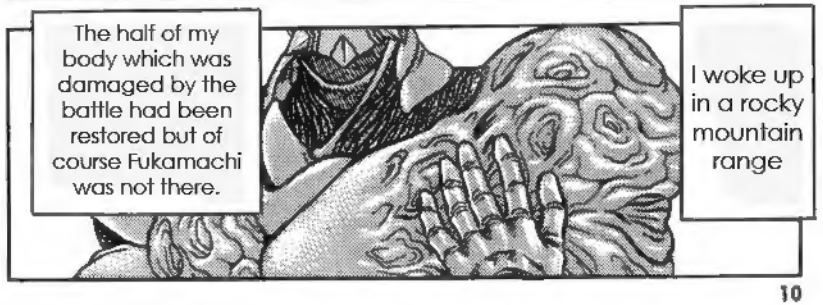
Retrieved by the hands of Cronos...
It's true form is the fusion of the Bio-Boost cells and the "Relic" cells.
this thing that was code named "Chrysalis".
In place of Fukamachi, Guyver I...
A "certain someone" continued to grow moment by moment...



Fukamachi's control metal and I were pulled into that center.

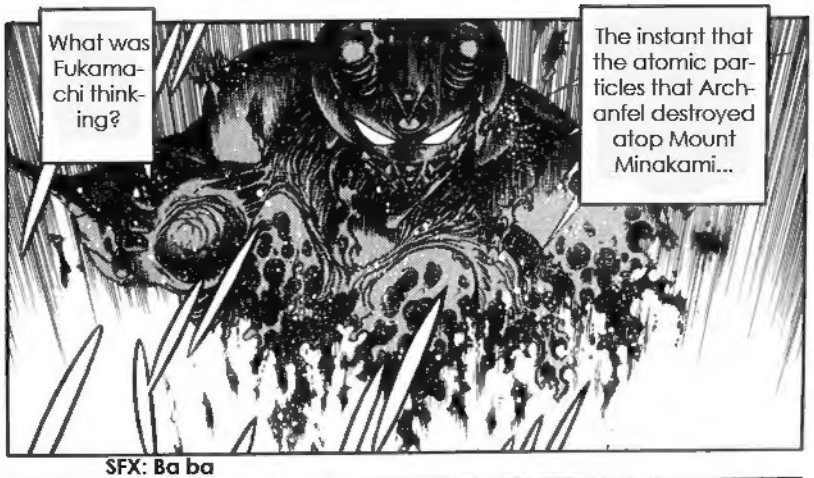


A year had already passed when I noticed...



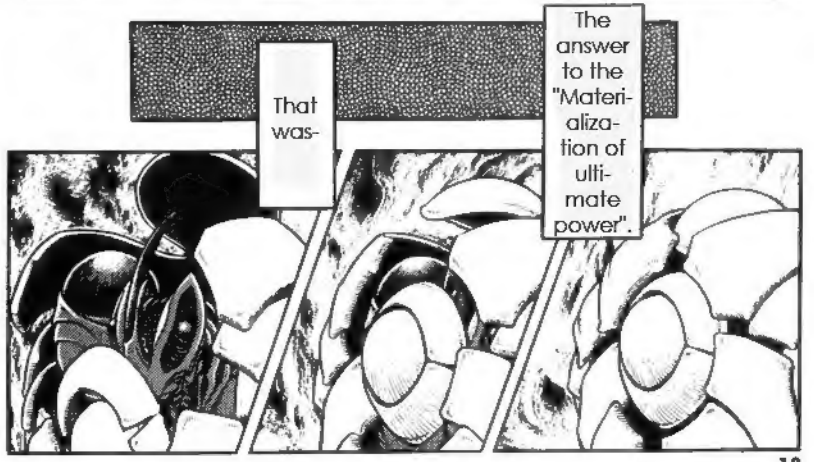
The half of my body which was damaged by the battle had been restored but of course Fukamachi was not there.
I woke up in a rocky mountain range

That was the "Gigantic"!
Guyver Gigantic!!
SFX: Ooo



What was Fukamachi thinking?
The instant that the atomic particles that Archanfel destroyed atop Mount Minakami...
SFX: Ba ba

To answer that, the control metal of the Bio-Boosted armor and the navigational sphere of the relic ship began to be stimulated.
In the brink of "death" his strong will controlled that "thought".

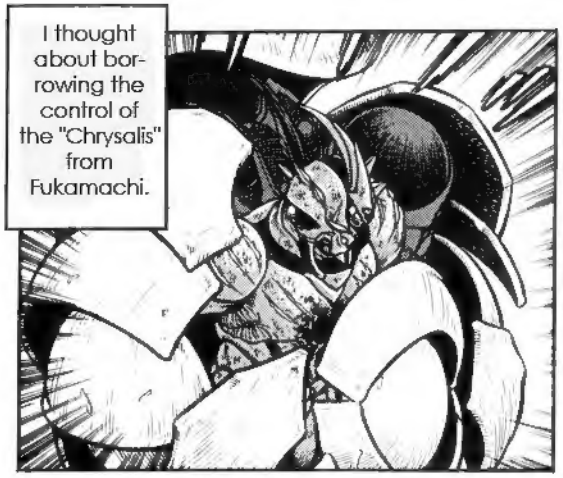


That was-
The answer to the "Materialization of ultimate power".

No matter what kind of battle power is equipped in the Giant Bio-Boosted armor...
Fukamachi who controls it has a weak spirit.
However...
appeared as the Zoalord Imakarum Mirabilis.
At that time a companion Murakami Masaki, who is a memorable person for Fukamachi,
Unable to show ruthlessness during a fight, he was defeated.

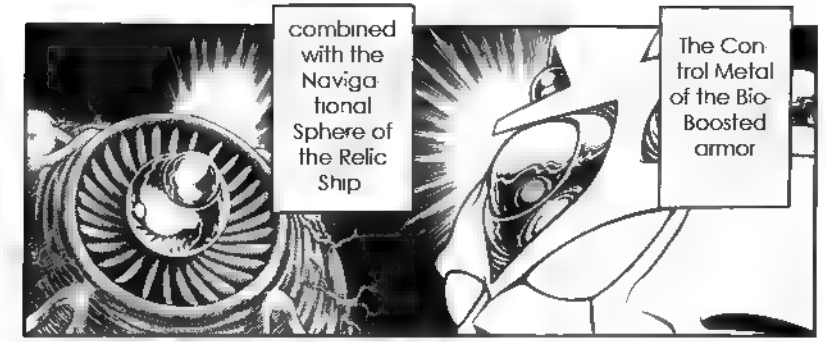
Predominant power and numerous "Super" armaments that are concealed in that gigantic figure.
It has truly assumed that spec of anti "Zoalord".

The destructive power of the Giant Bio-Boost is uncanny!
In Yokohama we exchanged fierce blows in the sea of fire.
I was able to repulse Imakarum Mirabilis.



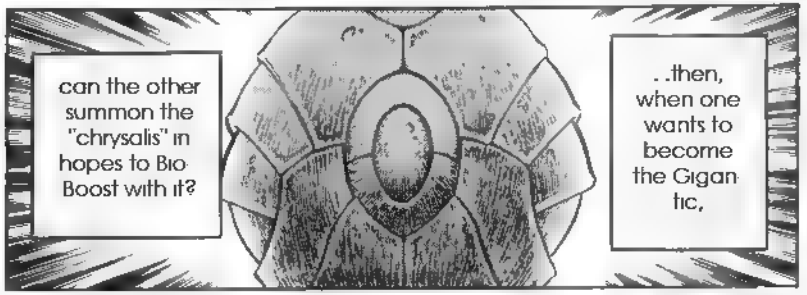
I thought about borrowing the control of the "Chrysalis" from Fukamachi.
If I am able to Bio-Boost with the Gigantic then-

"Black Giant Bio-boost", Gigantic Dark!



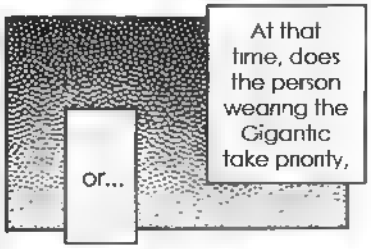
I had a feeling of confi dence.
I fol lowed on this ..

After this, me and Fukamachi can only share one Gigantic ..

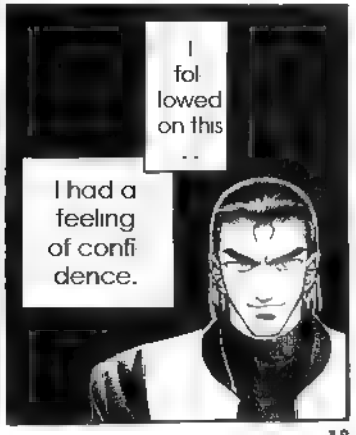


can the other summon the "chrysalis" in hopes to Bio Boost with it?
..then, when one wants to become the Gigan tic,

The control center of the Gigan tic,
The "Dua Control Metal", is

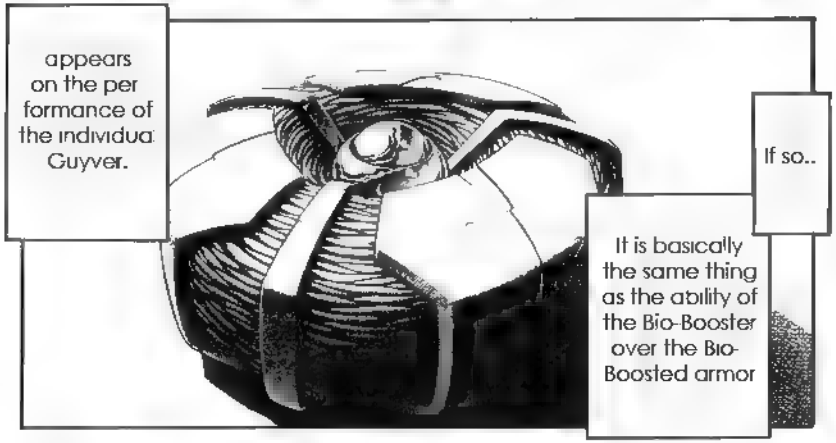


At that time, does the person wearing the Gigantic take priority,
or...



I fol lowed on this ..
I had a feeling of confi dence.

combined with the Naviga tional Sphere of the Relic Ship
The Con trol Metal of the Bio Boosted armor



appears on the per formance of the individua Guyver.
If so..
It is basically the same thing as the ability of the Bio-Booster over the Bio-Boosted armor

will it not react only to the one with the "stronger will"
Having the pri ority of using the Giant Boost Armor .

I was able to snatch the Gigantic during Fukamachi's boost.

. the result?

It was as I theorized

I was able to Bio-Boost like that.

It was definite

that Fukamachi was the one who gave birth to the "power" of the Giant Bio-Boost

A person who has an inferior will not be able to take over.

Commanding the "Stronger power" ..

A resolution which corresponds to that strong willpower is needed.

That is why the Giant Bio-Boost

has chosen me to be it's master!!

That.. was supposed to be it.

Wha ..
What .. was that?
!?

It seems to be swelling in an extraordinary size inside Cloud Gate.
What is going on with Kabral's body..
Yeah.
But even if you say his main body..

there is a special frequency of Electro-magnetic pulse oscillating

It seems they are heading towards Cloud Gate
Just as Sempai said..

But there are a lot of Zoanoids outside.

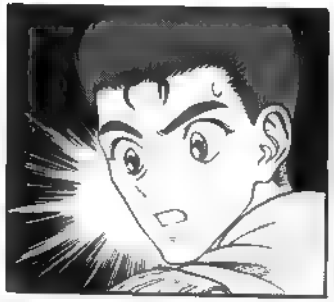
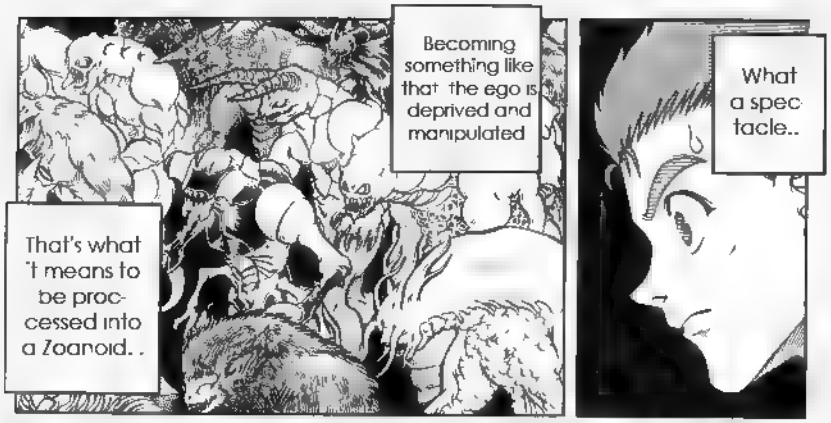
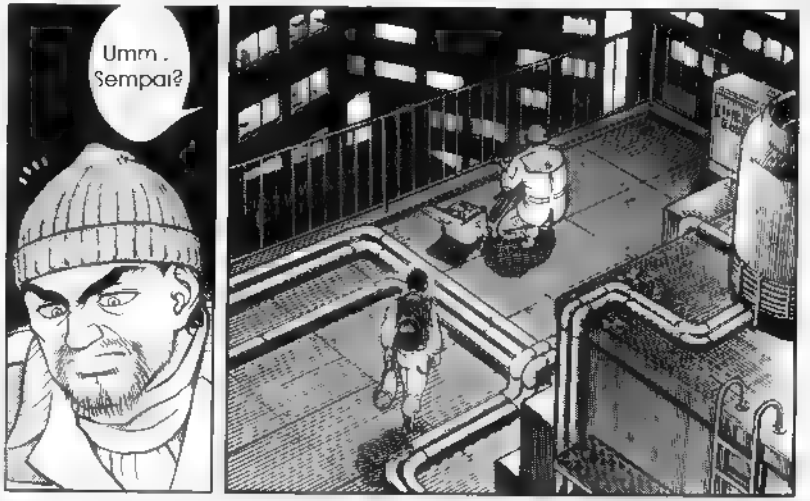
SFX: Fuu fuu





Becoming something like that the ego is deprived and manipulated
That's what it means to be processed into a Zoanoid..
What a spectacle..

That Guyver guy..
Aso-Sempai said that it was 'Human'.



Umm. Sempai?

Is it alright that we've come out like this?
We being in a place like this..

It is dense.
If the adults want to keep living then it will be better if those unknown things are known.

2 years ago. .

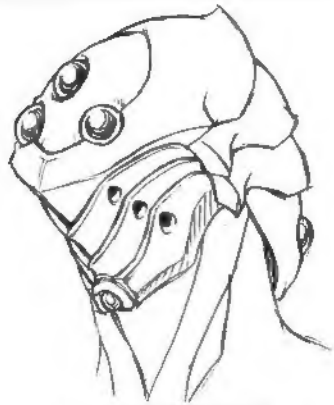
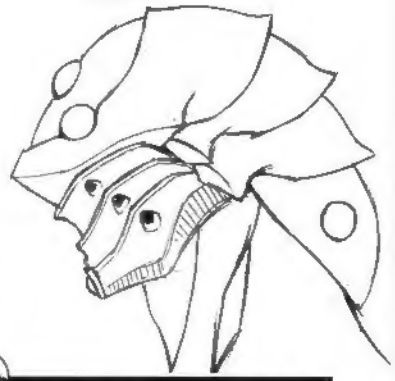
Libertus (Mode C)



The mask is an armor that shields the face.



Mode A is for Melee combat and is abundant in Power and Agility, Mode B is for Ranged Combat and is equipped with Organic Heat Cannons on both shoulders.
What comes after, is the Libertus' final weapon. A strong organic explosive is stored in the center of the lump in it's backpack, in other words a "Human Bomb" mode. The Ignition of the organic explosive is triggered by the Psychic wave of the commander Griselda, the Libertus has no authority to refuse. Once it moves into this form it is locked, transformation to other modes are made impossible.

Dragon Lord Kabral

Head part open: "Purgatorium".
The Photosphere in the breath of
the throat expands and discharges.

Complete form of the "Dragonic Burst". Made up of thousands of Zoanoids fusing their body, Zoalord Kabral's Final battle form. It accumlates the tremendous backbone power, that would suit it's agility to it's size. The Head Part becomes an arbalest class organic heat Cannon called the "Purgatorium". The heat wave from the discharge that splits the center of the head into 3, can penetrate a gigantic perforated hole in the structural material of a high rise building in an instant. In addition, the "Face Tentacles", similar to the Brain Mode, mixes with the thin hair tentacle group that covers the back, defending the blind spot of the behemoth.
